- Twi (fluent)
- English (intermediate)

About Me

Full-Stack Developer with 2 years of experience creating websites and web applications for businesses. I like building digital products that are not just functional, but actually useful for the people using them.

My work covers both frontend and backend development, with attention to performance, usability, and clean structure. I've worked on different projects, including business websites, custom tools, and web apps designed to help businesses run more smoothly.

Journey

- Backend&Full-stack
April 2026 – Present
- Frontend
November 2024 – February 2026
